### 0.1 Singular value decomposition

The singular value decomposition of  $m \times n$  matrix  $M$  is:

$$M = U\Sigma V^*$$

Where:

- $U$  is a unitary matrix ( $m \times m$ )
- $\Sigma$  is a diagonal matrix with non-negative real numbers ( $m \times n$ )
- $V$  is a unitary matrix ( $n \times n$ )

$\Sigma$  is unique.  $U$  and  $V$  are not.

#### 0.1.1 Properties

$$M^*M = U\Sigma^2U^*$$

$$(M^*M)^{-1} = V\Sigma^{-2}V^*$$

#### 0.1.2 Calculating the SVD

The SVD is generally calculated iteratively.
